Summary

Full-Stack Software Engineer with a demonstrated ability to quickly acclimate to new roles and responsibilities, as shown by a diverse professional background from teaching abroad to advancing in the interior design sector. Skilled in producing clean code and clear communication for collaboration. Driven by a love for continuous learning, I'm eager to grow and make meaningful contributions to innovative development teams.

Skills

Languages | Python3, Typescript, Swift, SQL, HTML5, CSS, Javascript ES6+
Backend | Django 4, PostgreSQL, MongoDB, FastAPI
Frontend | React, DOM manipulation

Work Experience

Big Red Warning | [app website](#) | Full-Stack Engineer | *San Francisco, California*   **Present**
- Developed a macOS desktop application using Swift, designed to deliver high-visibility meeting notifications, enhancing punctuality and time management for users.
- Engineered a user-friendly website employing React and Material UI to provide potential users with information about the application, fostering product awareness and enabling seamless app downloads.
- Ensured both the application and website are intuitive and user-centric, focusing on a clean UI/UX design, thereby promoting ease of use and providing clear, easily accessible information and functionality.

Galvanize | Software Engineering Immersive Resident (TA) | *Remote*   **2022-2023**
- Handpicked from over 50 peers to mentor a new wave of developers, contributing to the development of multiple full-stack applications.
- Built Python scripts and updated documentation for lesson plan management application being restructured from Django to FastAPI. Noted for clean code, thorough documentation, and level of communication.
- Co-led Alumni Workshop with over 20 attendees, to build a serverless application with Courier & Azure API

NicoleHollis | Procurement Specialist | *San Francisco, California*   **2019 - 2021**
- Managed purchasing for 20+ projects, handling 10,000+ orders with an annual spend of over $30 million.
- Maintained strong relationships with 5+ design teams, the accounting team, 15 clients, and 50+ vendors/suppliers throughout all phases of the procurement process.

NicoleHollis | Administrative Assistant | *San Francisco, California*   **2018 - 2019**
- Collaborated with company leaders to implement a program to improve company culture.

EPIK | Native English Language Teacher | *Daejeon, South Korea*   **2015 - 2017**
- Designed and delivered engaging activities focused on helping 600+ children, ages 8-12, gain skills and confidence with the English language.

Application Development Experience

Full Stack Engineer | Frontend Team Lead Packed | *Remote*   **2022**
- Spearheaded the design and development of the front end of a Django/React web application for travelers to manage and maintain their packing lists.
- Created a user-friendly interface using React and Bootstrap, which pulls relevant weather and currency data from third-party APIs based on the user's selected location and travel dates.
- Recognized for UI/UX design and execution. Received full marks.

Full Stack Engineer | Project Lead, CarCar | *Remote*   **2022**
- Led a three-engineer development team on system design and creating a Django/React web application that manages all inventory, sales, and service needs of an auto dealership.
- Built out the majority of the application's front end with React hooks.
- Collaborated with team members to troubleshoot and debug backend code using Django and Python.
- Noted by teammates for driving the project which resulted in full marks.

Education

Software Engineering 19 Week Immersive | Hack Reactor   2022
Bachelor of Arts | Academy of Art University   2012
